

Volcano

Chorus

I don't know, I don't know,
I don't know where I'm a gonna go when the volcano blows
(X2)

De ground is moving under me,
What do you mean how can that be?

De part of the earth that's under here,
Made up of plates in the lithosphere.

Chorus

De plates they float on a magma sea,
They cover the earth like a puzzle piece.

Plates de move when the magma current flows,
About as fast as your fingernails grow.

Chorus

Sometimes de plates they do collide,
And inbetween mountains could arise.

Sometimes when everything starts to shake,
Plates rub together and make an earthquake.

Chorus

One plate goes under the other one,
In a process dat we call subduction.

When de plate goes down de magma melts it,
And builds up pressure bit by bit.

Chorus

Den one day it does erupt,
Sometimes slow and sometimes abrupt.

De lava comes out nice and hot,
When it cools it forms igneous rock.

Chorus
